

CRYSTAL REPORTS III: ADVANCED REPORTING

This 1-day course immerses the student into the basic of Crystal Reports. Topics include:

- **Multi-pass Reporting**
Understand why and when different report objects execute and yield data
- **Dynamic Array Manipulation**
Understand how and why arrays can insert and remove data based on records in the database
- **Subreports**
Understand how subreports link to a Crystal Report.
- **Shared Variables (via Subreports)**
Learn how to pass data from a subreport back to the main report (and to other subreports).
- **Looping Control Structures in Complex Formulas**
Extend beyond If-Then-Else formulas
- **Report and Repository Custom Functions**
Re-use common business logic throughout the report, and other report files.
