

# CRYSTAL REPORTS II: REPORTING FOR BUSINESS SOLUTIONS

This 2-day course extends the knowledge covered in the first course. Here, students learn techniques for enhancing reports to meet their business and functional requirements. Topics include:

- **Repository Data Source**  
Learn to create reports from a centrally-located data source.
- **Creating Formulas**  
Understand the commonly-used functions used in formulas to drive your business requirements.
- **Managing Reports**  
Understand the how to organize your report files locally via the Workbench.
- **Variables and Arrays**  
Extending formulas to use dynamic values and their purpose.
- **Report Template**  
Create one report style, use in multiple reports.
- **Parameters**  
Learn how to build prompting for user interaction.
- **Cross-Tabs**  
Understand how to display summarized data quickly in a professional format.
- **Sections**  
Manipulate beyond the standard reporting sections to meet your reporting needs.
- **Specialized Reports**  
Learn how to create running totals, form letters, hyperlinks, alerts, Top/Bottom X reports, and dynamic images.
