

# CRYSTAL REPORTS SERVER XI

This online, instructor-led course provides you with the basics of administering Crystal Reports Server XI, a web-based content management system for storing, scheduling, and managing your Crystal Reports. Topics include:

- **Navigating InfoView**

Understand the interface that end-users will see when viewing, scheduling, and analyzing reports.

- **Navigating the Central Management Console**

System Administrators will learn the ins and outs of the web-based administration tool for setting up users, groups, folders, and reports in one centralized location.

- **The XI Security Model**

Understand how the security rights built into the system, and how creating custom rights will effect the user experience.

- **Application Security**

Create rights for each application installed on the Crystal Reports Server.

- **The XI Architecture**

Learn how all the components interrelate to form a scalable solution. Topics include the Central Configuration Manager, the Central Management System Server, and the Crystal Reports Servers and their roles in the XI system.
